

Knee pain:

is robotic assistance right for you?

SurgiCare of Boca Raton, a State of the Art Surgical Center, offers partial knee replacement surgery through **robotic assistance using the NAVIO® Surgical System**. NAVIO is a CT-free robotics-assisted platform – to deliver accurate and precise results. Compared to total knee replacement, partial knee replacement means less pain! a more normal feeling knee! smaller incisions? quicker rehabilitation!
and go home the same day!

Doctors Gupta, Saperstein and Kephart will help you understand your outpatient options for knee care and if you are a candidate for a partial knee replacement. They will discuss the latest technologies available and answer many of your questions on **Thursday, May 4th, 2017 from 6:00p.m. – 7:30p.m.**

Attend our free seminar to learn more about this outpatient option.

Featuring Manish Gupta, M.D., Alan Saperstein, M.D., and Curtis Kephart, M.D.

Thursday, May 4th, 2017

6:00 to 7:30 pm

Refreshments and appetizers will be served

Boca Raton Public Library

400 NW 2nd Avenue
Boca Raton, FL 33432

Individual results may vary. There are risks associated with any surgical procedure including NAVIO-enabled Partial Knee Replacement. NAVIO is not for everyone. Children, pregnant women, patients who have mental or neuromuscular disorders that do not allow control of the knee joint, and morbidly obese patients should not undergo a NAVIO procedure. Consult your physician for details to determine if NAVIO is right for you.
